Ring Power®

government.ringpower.com

Your Trusted Partner for Construction Equipment & Power Generation Sales, Support, and Service

In 1962, Ring Power Corporation became North Florida's full line Caterpillar dealer, later expanding into Central Florida. Headquartered in St. Augustine, Ring Power currently has 28 branch locations throughout the state of Florida, including large regional facilities in Tampa and Orlando.

Ring Power Corporation has become one of the largest Caterpillar dealers in the Southeastern United States through dedication to the mission of customer service. More than 2,700 employees across our 28 Florida locations work hard to provide the highest quality equipment, backed by a responsive, professional service and support team.

Ring Power will be your partner from machine selection and application advice to properly equipping machines and setting up customized support and maintenance programs for your agency.

At Ring Power, a sale isn't over after the financial transaction takes place. In fact, it's just beginning. From financing to support agreements, we will work with you over the life of your machine.

Ring Power is proud to partner with:

**FLORIDA
ASSOCIATION OF
COUNTIES**
All About Florida

PROCUREMENT SOLUTIONS

Our team will help you choose the right piece of equipment for your job and the right method of procurement. We represent all Ring Power divisions and the equipment and services they offer. We help reduce the time, effort and money spent in the procurement process and drive down your total budgetary equipment expense. And, all bids are completed through our governmental department with documentation maintained on all won bids for possible piggy-backing.

Life Cycle Costing (LCC) is a proven method that evaluates all owning and operating costs over a machine's working life. With LCC, you purchase the most reliable machine available on a total, long-term basis rather than settling for the lowest initial price. Understanding the total life cycle costs of equipment ownership is key to buying with confidence. Ring Power prides itself on offering the equipment and services to ensure the lowest life cycle costs and highest productivity.

LCC gives governmental agencies a standard for evaluating the quality and total cost of equipment being considered for purchase. Ring Power provides you with a customized calculation that compares the owning and operating costs of different manufacturer's machines and help you realize the best value for your taxpayer dollars.

Federal Contracts and out of state bids are tracked, with pricing, bid specifications, and contract requirements honored on all viable opportunities.

Contact your Ring Power Representative regarding any of the following state contract bid partners for your next equipment purchase, rental or lease.

TRACKING AND DOCUMENTATION IS MAINTAINED ON:

- The Florida Sheriffs Association Cooperative Purchase Program - flsheriffs.org/purchasingprogram/
- The Florida Construction & Industrial State Bid - www.dms.myflorida.com
- Sourcewell Contract (formerly NJPA) - www.sourcewell-mn.gov
- City of Tallahassee Contract

EQUIPMENT PROCUREMENT OPTIONS:

- Outright Purchases
- Short and Long Term Rentals
- Governmental Leases
- Total Maintenance and Repair Agreements always available
- Multiple finance options are available

SALES • RENTAL • GOVERNMENT LEASING • TOTAL MAINTENANCE & SUPPORT

FACILITIES, GROUNDS, PARKS & RECREATION MAINTENANCE

Ring Power sees value in continuously expanding our product lines to meet the needs of our customers. Most equipment is available for sale, rent, or lease. Flexible finance options are available.

A variety of work tools and attachments are available for machines to suit your application. Contact your Area Representative or Governmental Sales Manager for a quote or more information.

EQUIPMENT

- Agriculture Tractors
- Power Generators
- Aerial Lifts
- Forklifts
- Building & Construction Equipment
- Air Compressors
- Mowing Equipment
- Earth Moving Equipment
- Work Tools & Attachments
- Trailers
- Temperature Control

2

SALES • RENTAL • GOVERNMENT LEASING • TOTAL MAINTENANCE & SUPPORT

ROAD & BRIDGE CONSTRUCTION

As Florida continues to grow, Road and Bridge Construction and Maintenance is key – impacting not only our citizens, but also visitors. Ring Power offers the equipment you need to keep roadways maintained, and safe – to keep people and commerce flowing. Most equipment is available for sale, rent, or lease. Flexible finance options are available.

A variety of work tools and attachments are available for machines to suit your application. Contact your Area Representative or Governmental Sales Manager for a quote or more information.

EQUIPMENT

- Agriculture Tractors
- Power Generators
- Aerial Lifts

RECYCLING & WASTE HANDLING

We have your Recycling and Waste Handling equipment, power, and technology needs covered.

Cat's purpose-built Waste Handling equipment is equipped with enhanced guarding packages designed to keep both operator and machine safe throughout the shift, and specialty blades and buckets on these machines help you move more material in less time.

Our field service teams bring the shop to you for minor repairs and upkeep, and when it's time for

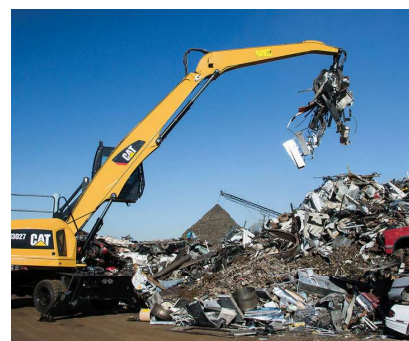

major repairs we'll work with you to schedule component rebuilds...and even full machine rebuilds.

Most equipment is available for sale, rent, or lease. Flexible finance options are available.

A variety of work tools and attachments are available for machines to suit your application. Contact your Area Representative or Governmental Sales Manager for a quote or more information.

EQUIPMENT

- Landfill Compactors
- Transfer Station Equipment
- Waste Handlers
- Power Generators
- Global Navigation Satellite System (GNSS)
- Mowing Tractors
- Dump Trucks

UTILITIES: WATER, SEWER, & ELECTRIC

Whether your job is aboveground or underground, Ring Power has the equipment you need to keep electric, water, and sewage systems at optimal performance.

In addition to Cat Construction and Power Equipment, we carry a full range of Cranes, Digger Derricks, Bucket Trucks, Customizable Vocational Work Trucks, Dump Trucks, and more

Most equipment is available for sale, rent, or lease. Flexible finance options are available.

A variety of work tools and attachments are available for machines to suit your application. Contact your Area Representative or Governmental Sales Manager for a quote or more information.

EQUIPMENT

- Excavators
- Wheel Loaders
- Tool Carriers
- Generators (Back-Up Power / Portable)
- Digger Derricks
- Bucket Trucks
- Vacuum Trucks
- Grapple Trucks
- Vocational Work Trucks (Open and Closed Service, Contractor Body, Grapple, etc.)
- Cranes

POWER GENERATION & DIESEL OUTBOARD ENGINES

Reliable prime, standby power, and demand-response generators are available for all sized operations. Our product line of Gas and Diesel generators ranges from 20kw to over 4mw.

We also carry Air Compressors, Diesel Engines, Gas Engines, and more.

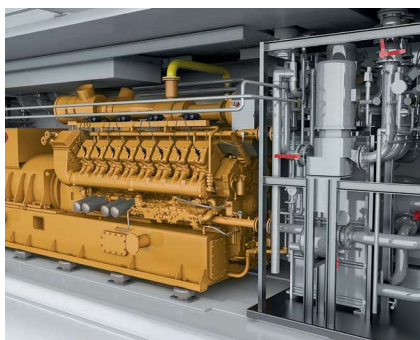

Whether an emergency or planned outage, we have you covered to keep you running.

Most equipment is available for sale, rent, or lease. Flexible finance options are available.

A variety of work tools and attachments are available for machines to suit your application. Contact your Area Representative or Governmental Sales Manager for a quote or more information.

EQUIPMENT

- Permanent Power
- Temporary Power
- Air Compressors
- Custom Installation
- Temperature Control
- Custom Fuel Tanks & Enclosures
- Diesel Outboard Engines

7

MATERIAL HANDLING

Ring Power offers a wide range of forklifts for your material handling needs – from the warehouse to the yard, to the back of the truck and all places in between.

Most equipment is available for sale, rent, or lease. Flexible finance options are available.

A variety of work tools and attachments are available for machines to suit your application. Contact your Area Representative or Governmental Sales Manager for a quote or more information.

EQUIPMENT

- CAT® and Mitsubishi forklifts
- Cushman personal carriers
- Bendi and Drexel narrow aisle forklifts
- Kalmar high capacity forklifts
- Big Joe pallet trucks and stackers
- Warehouse equipment and racking

GAS SOLUTIONS FROM CATERPILLAR

CAT® GAS GENERATOR SOLUTIONS

Get the reliable power you need with lower fuel costs. Industrial and commercial gas generator sets are designed to provide dependable power in prime and standby applications – ranging from 40-2500 ekw.

Greater Flexibility

Cat gas generators are certified for use in emergency and non-emergency operations. This means you can leverage your investment to do even more by using your genset for other purposes, such as peak shaving and load management.

High Reliability. Using pipeline natural gas rather than diesel means you don't have to worry about running out of fuel. Plus, you avoid the challenges and risks associated with fuel storage, such as location and availability.

More Fuel Options

Much of our generator portfolio can also be configured to operate on a variety of low carbon-intensity renewable fuels, including biodiesel, biogas, and blended fuels such as hydrogen.

Complete System Integration

We build durable, low-lifecycle cost power systems that can be integrated with controls; exhaust systems; fuel train; combined cooling, heat, and power skids; and switchgear.

Reduced Emissions

Clean burning fuel results in three times less NOx emissions relative to diesel, reducing total site emissions.

GAS STANDBY GENERATORS

Designed to meet your most challenging standby requirements, our industry-leading portfolio of gas standby generator sets is engineered to meet a full suite of critical market standards, including NFPA 110 Level 1 Type 10 requirements for quick start and load acceptance.

COMBINED HEAT AND POWER

Boost efficiency and power resilience using Cat® gas generator sets in combined heat and power (CHP) applications to ensure you get the reliable power you need to keep your business running while also lowering energy costs.

SERVICE & SUPPORT SOLUTIONS

To preserve the "Customers First" reputation that Ring Power was built on more than 60 years ago, we continually train our employees and work closely with our customers to assure complete satisfaction, especially after the sale. We take pride in offering the highest quality products and focus on providing you with best-in-industry support.

MACHINING

- BORING & MILLING - Complete range of diameters and lengths
- GRINDING & POLISHING - General purpose, surface, cylindrical and power lapping
- LATHE WORK - Vertical and horizontal

ENGINE SERVICES

- CYLINDER HEADS - Rebuild/resurface
- RODS - Repair/re-bush
- CRANKS & CAMS - Service check/polish
- FLYWHEELS - Reface
- BLOCKS - Counter bore/metal lacing repair, complete recondition or salvage
- MAIN BEARINGS - Align bore

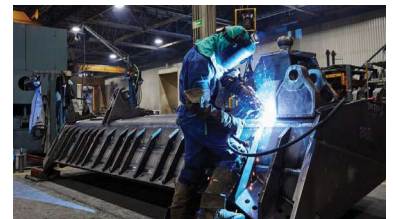

TRANSMISSIONS & DRIVE TRAINS

- Specialty Services
- Motor grader circles
- Rebuild and retrofit buckets and attachments
- Salvage of almost any component

FABRICATION SHOP

- Custom fabrication and pattern cutting
- 250 ton Accurpress/Brake Press
- Shear length up to 10'
- FastCAM/plasma form cutting
- Plate rolling up to 8 long x ½" thick
- Pipe roller up to 3"

RADIATOR SHOP

- Radiator recores and recore repairs
- Cleaning and repair of coolers, aftercoolers, heat exchangers
- Free shipping from all locations
- Clean and controlled environment
- Can service any brand

PAINT SHOP

Unlimited color options, superior color match capabilities, and tiered paint and protection options available for your budget and needs. Restore and protect the value of your equipment with a high-quality factory finish. with a reasonably priced, high-quality factory finish. Available for equipment, vehicles, containers, and more.

HYDRAULIC CYLINDER REPAIR

- Stringent inspection process
- 1 Year/2000 Hour Warranty.
- Testing. Three position pressure testing at 5,000 PSI simulates the working environment and ensures leak free repair
- Large Cylinders up to 35 ft. in length.
- Free Pick-Up and Delivery.

HYDRAULIC PUMP & MOTOR REPAIR

- Rebuild to original specifications
- Most makes and models - RexRoth, Sunstrand, Commercial, Denison, Linde, Vickers & more
- 200 hp test bench for simulated work environment

HYDRAULIC HOSE REPAIR

We carry a large selection of light, medium, and high-pressure hydraulic hoses, fittings, and adapters for most applications and are available in a broad range of pressure tolerances, materials, and fitting styles. All hoses are "Certified, Crimped and Cleaned" to Caterpillar specifications, and come with a set of seals, foam core plug cleaning, and end-capped to prevent contaminants.

UNDERCARRIAGE PARTS & SERVICE

Undercarriage can often be rebuilt or repaired, without needing to be entirely replaced. Preventive maintenance, inspecting the undercarriage and identifying undercarriage parts that need to be replaced or repaired can help minimize costs.

CYLINDER ROD RESURFACING – Advanced Chrome Technologies (ACT)

- 3 X longer life than traditional chrome
- High-velocity thermal coating
- Fast turnaround
- Superior wear
- Extended Life
- Environmentally safe
- For cylinders up to 20' long and 20" in diameter

A/C REPAIRS

Our field service technicians come to your job site to troubleshoot, diagnose, make adjustments and perform repairs on your air-conditioned equipment. Complete system installations are also available.

AUTOMATED LUBRICATION SYSTEMS

Constant lubrication of machine components while machine is in operation extends bearing and cylinder life and reduces downtime

- Closed system prevents contamination
- Provides quick payback on investment

PETROLEUM RECYCLING SERVICES

- Annual, semi annual, and monthly fuel tank state compliance inspections (Underground, Aboveground, Belly, Day Tanks)
- AHCA/DEP compliant tank inspections & testing (Tank Tightness, Hydrostatic, Line Leak)
- Fuel tank cleaning & polishing
- Microbial treatment & preventative maintenance
- Transfer & clean fuel on generator replacements
- Rust mitigation
- Repairs (Monitoring systems, gauges, senders, vents, piping, anti-siphon valves, check valves)

MACHINE REBUILDS

Cat® equipment is "BUILT to be Rebuilt", with a sustainable design that allows the machine to be remanufactured by reusing many of the original parts, reducing waste and delivering a cost-effective alternative to replacing with new equipment. A Rebuild can also include product enhancements introduced after your equipment was first manufactured – to help your fleet run smarter and smoother. Find out how to qualify for extended power train warranty up to 5 years/10,000 hours.

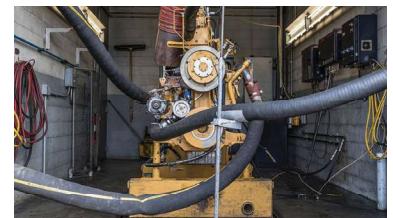

Cat Certified Machine Rebuild:

Your machine will be stripped to the frame and all non-metal components will be replaced.

Second Life Rebuild:

Your machine will be inspected to identify only the parts and components that need to be reconditioned or replaced to return it to prime working condition.

Component Rebuilds:

Economical option focusing on parts of your machine that are most critical to its performance. Power Train, Engine, and Hydraulics are most common.

VISIONLINK™ AND TELEMATICS

- Simplifies fleet management
- Monitor and track your entire fleet from your laptop or mobile device
- Manage and maximize machine usage
- Schedule routine maintenance
- Reduce overall operating costs
- Wireless satellite technology transmits essential machine information
- Installed at time of purchase, or retrofitted on any make or model

S•O•SSM FLUID ANALYSIS PROGRAM

- Regularly scheduled analysis of oil and fluid samples help detect problems early, predict necessary repairs, reduce downtime, and minimize repair costs.
- Wear Metal Rate Analysis (ppm)
- Infrared Analysis (Engines, hydraulics, transmission) Particle Counts (ISO Code levels – non-engine compartments)

CONDITION MONITORING

We partner with you by turning data into actionable insights for your fleet. Condition Monitoring brings together asset data, fluid analysis, inspection results, and more to provide a clear, shared view of fleet health. Our team works side by side with you and your product support representative, actively monitoring fault codes and fluid trends to help prevent unnecessary downtime. Together, we identify priorities, share custom notifications and recommendations, and guide decisions before issues become problems. By leveraging historical data reported bi-weekly, we help you refine operating practices, optimize machine utilization, and maintain a stronger, more reliable fleet. At no extra cost, we also help you build, monitor, and manage your Preventive Maintenance systems to keep your operation running smoothly.

Powered by Data. Driven by Partnership.

PARTS SUPPORT

\$28 million inventory of Genuine Cat Parts

170,000 + line items stocked

84% of parts orders filled at the counter

99% of parts orders filled within 24 hours

Purchase parts online, in-person, or call-in

In addition to Genuine Cat Parts, we are the authorized dealer for over 20 equipment manufacturers supplying OEM parts for crane, material handling, forestry, agricultural, paving, and compressed air industry.

Ring Used Parts inventories over \$1.8m in high quality used, new surplus, and rebuilt parts.

TOTAL MAINTENANCE & REPAIR AGREEMENTS (TM&R)

Reduce Costs and Maintain Smooth Operations

All equipment needs maintenance and repairs throughout its life cycle. Managing these services and their associated costs takes time.

A total maintenance and repair agreement (TM&R) is an arrangement between you and Ring Power as a service provider. It includes a set price for maintenance and repair on a particular piece of equipment. Instead of covering costs as issues arise, you pay a fixed rate for a specific time. We'll work with you to analyze current service costs and compare them to the expenses for particular services in the agreement to develop a personalized plan for your needs. Once we've set a fixed price based on hours used or months, you will receive a dedicated equipment maintenance specialist who handles all the details, and tracks services and equipment performance. If there are codes or faults, we'll quickly dispatch a technician and use genuine Cat parts for any service or repair.

Here are a few services your agreement might include:

Repairs: When components break down, our technicians will fix them. Our repairs include everything from power train services to hose or belt fixes.

Routine maintenance: We replace filters and oil, lubricate fittings and perform other work required for ongoing performance.

Waste management: Our technicians safely dispose of waste oil and filters.

Component replacements: As parts wear, we swap them for new ones. Our replacements include ground engaging tools.

Inspections: We set up a regular schedule for visual and technical inspections to check for anything unusual.

Fluid Analysis: Routine S•O•S fluid testing identifies wear, contamination, and potential issues early to prevent costly failures and keep your equipment running longer.

With a TM&R agreement, you gain:

More consistent management of cash flow

Better long-term value from your equipment investment

More predictable equipment operations with fewer breakdowns

More time spent on work and less on equipment management

Tailored services built around your equipment usage and maintenance

SERVICE & SUPPORT SOLUTIONS

CATERPILLAR® CERTIFIED OPERATOR TRAINING

- Training for safety and efficiency.
- The success of your operation depends on the ability of your operators.
- With over 40 years of on-the-job experience, our Cat® Certified Ring Power training team helps your operators reach their full potential.
- Use 10 – 12% less fuel daily
- Move more material in less time
- Reduce wear and tear on equipment
- Understand importance of safety

3 Training Levels Available

- Focus on Safety and Proficient Operations
- Classes Can Be Held At Our Facility or Yours
- Tailored to Your Needs
- Machine Family Specific
- Bilingual Available!

Cat® Simulators

Using Cat Simulators to train operators can significantly impact an agency's safety initiatives and reduce machine and attachment damage that inexperienced operators often cause.

- Built with authentic Cat® controls
- Measurable benchmarks help track learner progress
- Training exercises based on real-world machine applications

Available for:

Excavators, Dozers, Articulated Trucks, Small Wheel Loaders, Compact Track Loaders And More...

Advanced Training for Equipment-Specific Applications:

- Trenching
- Truck loading
- Finish grading
- And more

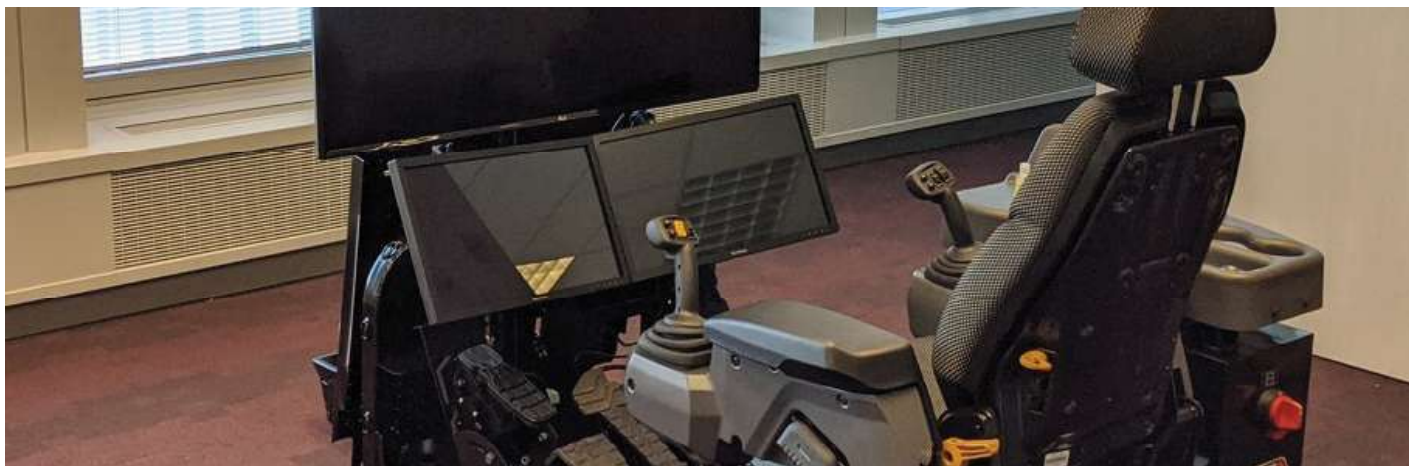

CAT® COMMAND TECHNOLOGIES

Technology to enhance safety and increase productivity in hazardous work environments.

The **Cat Command Console** allows the user to work securely and comfortably outside the machine, while remaining onsite and in direct visual contact by line of sight. It's ideal for short-term and emergency use and requires no onsite communications infrastructure.

- Line of sight: User remains onsite and in direct visual contact of the jobsite

The **Cat Command Station** enables the user to work remotely in a comfortable, seated "virtual cab" with familiar machine displays and universal controls. Located in a command center onsite or many miles away, this non-line of sight technology also reduces operator fatigue due to an improved working environment.

- Non-Line of sight: User can be onsite with an obscured view of the jobsite or many miles away

When law enforcement officers are called to any emergency situation – they have to be prepared for the worst case scenario. Whether dealing with a hostage rescue, barricaded suspects, riot scene, or natural disaster, having the tactical advantage is critical.

The Rook Armored Vehicle is custom designed and fabricated by Ring Power Corporation, the North and Central Florida Cat® Dealer. Utilizing the powerful Cat® chassis as the base, The Rook provides service advantages that other tactical vehicles just don't have. Unlike traditional armored vehicles, The Rook is capable of being used in tight areas both inside and outside of public buildings to transport personnel or equipment and for surveillance. It is designed with mission specific attachments that increase job safety and can easily be changed depending on situational needs.

Law enforcement agencies across the United States and around the globe utilize The Rook to confront complex threats and make tactical operations safer.

“The Rook is a true game changer when it comes to our tactical operations.”

— MAJOR KEITH A. STONE

PENNSYLVANIA STATE POLICE
DIRECTOR, BUREAU OF EMERGENCY AND SPECIAL OPERATIONS

EQUIPMENT SPECIFICATIONS

- Cat® chassis
- 98 Gross HP Engine
- Two-Speed Power Train 8.4 mph
- Operating Weight 14,030 lbs. (Machine only)
- Ground Pressure 5.0 psi
- Fuel Tank 31.7 gal.
- Bucket Pin Height at Maximum Lift 126.3 in.
- Vehicle Width 78.0 in.
- Hydraulic Quick Coupler
- NIJ Level IV Armor
- Enclosed ROPS Cab with Air Conditioner/Heater
- Cat® “Intelligent Leveling” system

**All specifications are approximate and subject to change.
The Rook Patent Pending.*

STANDARD FEATURES: MISSION-SPECIFIC ATTACHMENTS

- Armored Deployment Platform (ADP) with integrated wireless video camera system
- Hydraulic Breaching Ram (HBR) with integrated video system
- Vehicle Extraction Tool (VET)
- Grapple Claw (GC)
