LONG RUNS AND FAST CHARGING... SHIFT AFTER SHIFT

Powered by a highly efficient 48-volt lithium-ion battery, the Mitsubishi Forklift Trucks electric pallet truck moves more pallets per hour and provides more hours of operation—in one charge. With a runtime of four to six hours and a short charging time, the truck delivers longlasting, reliable performance, making it the perfect choice for short- and mid-distance runs.

INNOVATIVE TECHNOLOGY

Multi-function control handle incorporates butterfly-style thumb controls, emergency reverse button, horn button, lift button, and key switch for ease of use.

REDUCED OPERATOR FATIGUE

Designed with an ergonomic spring-loaded steering handle and long tiller with a large handle grip for an easy and comfortable hold and strain-free operation.

DURABLE DESIGN

Integrated rocker arm is cast in a single piece, extending product life in tough applications.

EXCEPTIONAL MANEUVERABILITY

With its compact design, low service weight, and small turning radius, the truck is ideal for tight spaces in a variety of applications. Creep speed function is helpful for slow and confined areas.

SMOOTH PERFORMANCE

Brushless drive motor offers stepless speed control for a smoother transition from braking to moving. The motor's disc brake system delivers smooth and reliable operation, while reducing parts and maintenance costs that are associated with traditional brake systems.

ZERO BATTERY MAINTENANCE

Lithium-ion technology out-performs lead-acid batteries and eliminates the need for routine battery maintenance and watering. These batteries do not emit gas and are maintenance free. EMC and TUV certified charger included.
