

Ring Power®

CUSTOMER TRAINING PROGRAMS

Ring Power Training & Development

Instructor-led courses, online learning, and foundational training designed to build knowledge and support equipment performance.

FOUNDATIONAL SYSTEM ASSESSMENTS

\$100/ TEST

Available Assessments

- Hydraulic Fundamentals
- Electrical Fundamentals
- Engine Fundamentals
- Powertrain Fundamentals
- Air Conditioning Systems

How it Works:

- Tests are emailed to participants and completed online.
- If a participant completes a test-out and later enrolls in the related instructor-led course, the \$100 assessment fee is applied toward the course cost.

INSTRUCTOR-LED TRAINING

Hands-on training delivered by experienced instructors at Ring Power training facilities.

Pricing:

\$650 per person / per day

Course pricing varies based on course length.

Training Locations:

Saint Augustine | Orlando | Tampa

FOUNDATIONAL TRAINING OFFERINGS

Introduction to Electronic Technician

1 Day – \$650

This course provides a basic understanding of Caterpillar Electronic Technician and how it is used. It focuses on a selection of specific tests technicians will use in their field of work.

Engine Fundamentals

3 Days – \$1,950

This course provides a fundamental understanding of Caterpillar diesel engine systems and their operation. It covers essential systems including Basic Components, Cooling, Lubrication, Air Induction, Exhaust, Fuel, and Engine Power.

Hydraulic Fundamentals

4 Days – \$2,600

This course introduces technicians to hydraulic systems and components. It also introduces the ISO fluid power symbols on hydraulic schematics and the fundamentals of fluid contamination. By the end of the course, technicians will be able to follow a schematic, identify system components, read an oil sample, and construct simple hydraulic circuits.

Electrical Fundamentals

4 Days – \$2,600

This course provides a comprehensive understanding of fundamental electrical principles. By the end of the course, participants will be able to apply concepts such as voltage, current, resistance, and Ohm's Law to describe and analyze basic electrical circuit operations.

Powertrain Fundamentals

3 Days – \$1,950

This course provides a fundamental understanding of the basic components and operation of powertrain systems used in Caterpillar machines. Topics include basic components, clutches, final drives, torque converters, differentials, brakes, and undercarriage.

Air Conditioning (MACS)

3 Days – \$1,950

This course is designed for the MACS 609 Certification of technicians in the servicing and troubleshooting of operator compartment A/C systems. The technician will gain a working knowledge of A/C systems, recovery, recycle & recharge equipment, leak detection, refrigerant identification, lubricant choices, and temperature/pressure relationships.

Course dates available upon request

ONLINE LEARNING PLATFORM

DEALER PERFORMANCE CENTER (DPC)

A one-year subscription provides access to a wide range of technical learning modules and training resources.

Annual Subscription Pricing:

1-4 Users – \$650 per account

5-9 Users – \$600 per account

10+ Users – \$550 per account

Renewal Pricing:

\$400 per user

LEADERSHIP TRAINING

Professional development courses designed to strengthen communication, collaboration, and team performance.

Course Format:

\$650 per person

Available Courses:

- **Understanding Self and Others**
 - Participants will understand their values, apply the DiSC model, explore personal development, and create a vision board with SMART goals for the future.
- **Communication Effectiveness**
 - Participants will learn the importance of effective communication, active listening skills, various communication styles, and how to give constructive feedback.
- **High Performing Teams**
 - Participants will learn to identify high-performing team traits, understand team-building stages, recognize personal strengths and weaknesses, and apply strategies to overcome challenges.
