ATTACHMENTS

POWER BOX RAKES

For clearing and preparing soil in landscape finishing applications, providing evenly spaced seedbed in many soil types and conditions. Can dethatch, remove old lawns/weeds, grade, level, rake and remove debris.

BROOMS

Perfect clean-up work tools. Clean and remove dirt, rock and other debris from streets, parking lots, and factory floors. Also used in paving recycling, demolition and airport maintenance.

LANDSCAPE TILLERS

Perfect work tools for landscaping, agricultural and construction applications. Hardened, replaceable tines quickly pulverize soil, mix other materials into soil and even stabilize and level existing terrain.

COLD PLANERS

Effectively mill asphalt and concrete, restoring surfaces to specific grades or levels. Available in standard and high flow models.

BRUSHCUTTERS

High strength, high speed cutting blades efficiently cut brush, small trees and dense overgrowth for easy removal. Ideal for clearing overgrowth from highway medians, utility easements, and for initial land clearing for housing and parks and recreational areas.

FORESTRY HEAD

For those in between jobs where mowing and mulching is needed. The Forestry Head can cut up to a 14" tree and reduce 6" saplings into mulch.

MULCHERS

Designed for high performance while cutting and mulching vegetation and undergrowth in typical forest terrain. Reduces saplings, shrubs, and trees into mulched material, making it ideal for environmental maintenance or to clear land for construction purposes.

MULCHING HEAD

Offering front-mounted mulchers for skid steers and boom mounted mulchers for excavators.

ANGLE BLADES

Push dirt and gravel with ease, and efficiently perform finish grade work in construction, landscaping and road building.

VIBRATORY COMPACTORS

Ideal for asphalt patchwork and for compacting soil, sand and gravel prior to pouring concrete or laying asphalt. Provide excellent maneuverability for small compacting jobs that do not require a dedicated roller.

LASER GUIDED BOX BLADE

Cat Box Blades are designed for grading and leveling. Each model is designed to operate both manually and automatically with the use of Laser or GPS grading systems.

SKID STEER FORKS

Load and transport palletized materials quickly and efficiently. Excellent for construction, industrial, agricultural and landscaping applications.

SMART GRADER BLADE

Cat Smart Grader Blade attachments are for cutting, moving and grading dirt, gravel, sand and virtually any other material used as a base. Can be equipped with laser and GPS.

AUGERS

Drill holes for footings, fencing, signs and trees. Optimum speed and visibility, break-out capabilities and capacity torque deliver highest possible productivity in most soils. Standard and high flow models.

INDUSTRIAL GRAPPLE BUCKETS & GRAPPLE RAKES

Durable demolition work tools. Easily handle difficult objects like railroad ties, rocks, demolition scrap and recycling debris.

Great for loose, hard-to-handle recyclable material. Pick up irregularly shaped objects, pierce and carry paper, cardboard, wood and light gauge metal scrap.

HAMMERS

Ideal for demolition—break up concrete, asphalt, rock or masonry. New models feature improved breaking productivity, more power and are totally unique to Caterpillar.

MATERIAL HANDLING ARMS

Load, carry and position materials found in industrial, construction and agricultural applications. Also good for transporting and setting trees or shrubs for landscaping.

TRENCHERS

Great work tools for utility contractors. Cut straight, narrow trenches in soil for laying electrical and cable lines—or water and gas pipes. Available in standard and high flow models.

LIFTING SOLUTIONS YOU CAN COUNT ON.

CRAWLER CRANES

LATTICE BOOM

100 - 400 Ton Capacity

Mounted on an undercarriage with a set of tracks for stability and mobility, crawler cranes can move around on a job site and perform lifts with little set-up and are capable of traveling with a load.

ALL-TERRAIN CRANES

100 - 400 Ton Capacity

With anywhere from two to seven axles, these mobile cranes combine the road-ability of truck mounted cranes with the maneuverability of rough terrain cranes, and can travel on public roads or on the job site using all-wheel and crab steering.

ROUGH TERRAIN CRANES

30 - 100 Ton Capacity

Mounted on an undercarriage with four rubber tires, rough terrain cranes are designed for pick-and-carry operations as well as off-road and "rough terrain" applications. Outriggers are used to level and stabilize the crane for hoisting.

TRUCK MOUNTED CRANES

50 - 115 Ton Capacity

Mounted on truck carriers for highway travel, truck mounted cranes require no special transport. Outriggers extend horizontally from the chassis and vertically to level and stabilize the crane for hoisting.

BOOM TRUCKS

22 - 60 Ton Capacity

Comprised of a telescoping crane boom mounted on a commercial truck body for easy transport, boom trucks are available with either stand-up or swing-seat controls.
